

## Progress Report

**Name:** Gomathi sankar  
**Course:** Introduction to Symbolic Math with MATLAB  
**Progress:** **100%** complete (as of 22 February 2022)

### Chapters

- |   |                                   |
|---|-----------------------------------|
| 1. Introduction <b>100%</b>                                     | 12. Review Project II <b>100%</b> |
| 2. Creating Symbolic Variables <b>100%</b>                      | 13. Next Steps <b>100%</b>        |
| 3. Mathematical Expressions with Symbolic Variables <b>100%</b> |                                   |
| 4. Creating and Solving Symbolic Equations <b>100%</b>          |                                   |
| 5. Algebraic Manipulation and Simplification <b>100%</b>        |                                   |
| 6. Working with Assumptions <b>100%</b>                         |                                   |
| 7. Working with Units of Measurement <b>100%</b>                |                                   |
| 8. Creating Symbolic Functions <b>100%</b>                      |                                   |
| 9. Visualizing Symbolic Functions and Equations <b>100%</b>     |                                   |
| 10. Review Project I <b>100%</b>                                |                                   |
| 11. Calculus with Symbolic Math <b>100%</b>                     |                                   |
